Phone: [\(57\) 3105942760](tel:(57)3105942760)

▼ Professional Summary

Backend Software Engineer with 15+ years of experience designing, developing, and maintaining scalable and secure applications using C#, .NET, and ASP.NET Core. Strong expertise in Microservices, RESTful API development, Domain-Driven Design (DDD), Clean Architecture, distributed systems, and relational databases. Experienced in designing and integrating cloud-based solutions on AWS and Azure, as well as implementing CI/CD and Infrastructure as Code using GitHub Actions, Terraform, AWS CDK, and Ansible. Brings a strong focus on backend architecture, performance, maintainability, and secure API development, with additional experience in React for collaborating effectively across full-stack environments.

▼ Professional Experience

Software Development Engineer

Zemsania – Accenture Navitaire Project (Remote)- (Feb 2026-Jul 2026)

Tech Stack: .NET, C#, ASP.NET Core Web API, REST APIs, Swagger/OpenAPI, xUnit, Azure DevOps, GitHub Copilot, Feature Flags, Dependency Injection, Enterprise API Development.

- Developed and maintained Schedule API features for Navitaire in a .NET-based enterprise application, implementing REST API endpoints, service-layer logic, request/response contracts, converters, validators, and Swagger examples.
- Built comprehensive automated test suites, including unit, component, and integration tests, using mocked dependencies and live environment validation to ensure endpoint reliability, routing correctness, authentication behavior, validation handling, and backend service integration.
- Applied enterprise development standards by implementing feature-gated functionality, nullable reference type compliance, XML documentation, consistent API response patterns, and adherence to established architecture and coding guidelines.
- Leveraged GitHub Copilot to accelerate development, improve code consistency, support refactoring, and increase productivity during feature implementation and automated test creation.
- Participated in Azure DevOps pull request reviews, validating Schedule API implementations against architecture standards, testing requirements, feature management rules, coding conventions, and maintainability best practices.

Backend Developer

GoNet USA – AON CoverWallet Project (Remote) – (Jul 2023–Jul 2024)

Tech Stack: .NET Core, C#, ASP.NET Web API, PostgreSQL, AWS S3, Datadog, GitHub, GitLab, REST APIs, SDLC.

- Implemented unit tests using xUnit and Moq, increasing coverage and ensuring compliance with PRI business requirements.
- Developed and integrated PRI system functionalities with CoverWallet applications using REST APIs and web services; managed document storage in AWS S3.
- Designed PostgreSQL data models and implemented AWS-based logging for improved incident tracking and observability via Datadog.
- Supported deployments across test and production environments, ensuring smooth releases and operational stability.
- Collaborated with business teams to refine requirements and improve system performance and usability.

Technical Leader

Superintendencia de Sociedades — Bogotá, Colombia (Jan 2021 – Jun 2021)

Tech Stack: .NET Core, C#, ASP.NET MVC, ASP.NET Web API, LINQ, JavaScript, jQuery, SQL Server, Informix, HTML5, CSS, EF, Git, Azure DevOps, REST APIs, Postman, SDLC, Unit Testing, Integration Testing, Scrum.

- Led a development team responsible for maintaining and enhancing 20+ enterprise applications, ensuring operational continuity and timely delivery of new features.
- Managed the full Agile/Scrum workflow by consolidating the product backlog, defining sprint tasks, assigning work to developers, and tracking progress through Azure DevOps.
- Coordinated with QA and infrastructure teams to plan, validate, and execute successful production deployments, reducing release issues and improving deployment reliability.
- Oversaw technical design reviews and supported developers with code quality, best practices, and troubleshooting to maintain high system performance and maintainability.

Senior .NET Developer

Superintendencia de Sociedades — Bogotá, Colombia (Apr 2020 – Dec 2020)

Tech Stack: .NET Core, C#, ASP.NET MVC, ASP.NET Web API, SQL Server, Informix, LINQ, JavaScript, jQuery, Entity Framework, SOAP, REST APIs, Postman, Git, Azure DevOps, Unit Testing, Integration Testing, SDLC, JWT Authentication.

- Designed the migration of a legacy Informix database to SQL Server, improving system stability, performance, and long-term maintainability while ensuring uninterrupted service for internal and consumer-facing applications.
- Consolidated fragmented SQL queries across multiple applications into a centralized web services layer, using stored procedures and a SQL translation mechanism to standardize data access and reduce redundancy.
- Implemented JWT-based authentication for API security and documented API deployment procedures, improving traceability, version control, and operational consistency across environments.

Senior .NET Developer

ITBF Consulting - Bogotá, Colombia (Aug 2019 – Dec 2019)

Tech Stack: .NET Core, C#, ASP.NET MVC, ASP.NET Web API, SQL Server, LINQ, JavaScript, jQuery, Entity Framework, SOAP, REST APIs, Postman, Git, Scrum, Unit Testing, Integration Testing, SDLC.

- Consolidated and centralized the Superintendencia de Sociedades web services into a unified, reusable shared project, enabling consistent consumption of services across multiple applications and reducing duplicated code and maintenance overhead.
- Improved system interoperability by standardizing API structures, enhancing maintainability, and facilitating faster onboarding for new developers and teams.

Senior .NET Developer

ComWare S.A. — Bogotá, Colombia (Aug 2018 – May 2019)

Tech Stack: .NET Core, C#, ASP.NET MVC, ASP.NET Web API, SQL Server, LINQ, Entity Framework, Active Directory, Token-Based Authentication, REST APIs, Postman, HTML, CSS, Git, Scrum, SDLC, Unit Testing.

- Developed the core use cases for the Consumables Registration system for the Ministry of Agriculture, delivering stable and scalable backend components aligned with business requirements.
- Built an application for dynamic form generation, enabling flexible data capture and reducing the need for hard-coded forms, improving maintainability and adaptability for future requirements.

Senior .NET Developer

DB-System LTDA — Bogotá, Colombia (May 2017 – Feb 2018)

Tech Stack: .NET Framework, C#, ASP.NET MVC, ASP.NET Web API, Web Forms, JavaScript, jQuery, LINQ, SQL Server, Entity Framework, HTML, REST, Unit Testing, Git, SDLC.

- Developed and maintained use cases for the Royalties Management MVC application for the Ministry of Finance, ensuring secure and reliable operations through SQL Server and certificate-based authentication.
- Built backend components and API services, improving system consistency, data access, and performance.
- Collaborated in an outsourcing delivery model, following SDLC best practices to meet government standards and project timelines.

.NET Software Developer

INTERGRUPO — Bogotá, Colombia (Sep 2014 – Jul 2016)

Tech Stack: .NET Framework, C#, ASP.NET MVC, Web Forms, Web API, LINQ, SQL Server, Entity Framework, JavaScript, jQuery, HTML, Git, Unit Testing, Integration Testing, SDLC, OOP.

- Designed and developed the Customers and Affiliates application for Compensar from the ground up using ASP.NET MVC, improving operational efficiency and user experience.
- Partnered with the solutions architect to define the application's initial architecture and successfully delivered five core use cases in the first development phase.
- Enhanced and maintained critical CITY BANK applications, implementing new features, resolving defects, and supporting User Acceptance Testing (UAT) to ensure high-quality releases.

.NET Software Developer & Technical Lead

TATA Consultancy Services — Medellín, Colombia (Sep 2012 – Feb 2014)

Tech Stack: .NET Framework, C#, Web Forms, MVP Pattern, Oracle, Sybase, HTML, SDLC, OOP, Unit Testing, Postman, Git, Team Leadership.

- Designed and developed internal applications and SOAP/REST web services for Claro Colombia, using Oracle and Sybase to support high-availability telecommunications operations.
- Led a team of six junior developers, assigning tasks, reviewing code, and guiding the implementation of features for Windows and Web applications as part of the Cobiscorp – HSBC Bank project.
- Ensured adherence to SDLC standards, code quality practices, and proper documentation to maintain consistency across distributed teams.

.NET Developer

MAINSOFT — Bogotá, Colombia (Nov 2009 – Jul 2011)

Tech Stack: .NET Framework, C#, ASP.NET Web API, XML, SOAP, LINQ, SQL Server, HTML, Index Server, SDLC, OOP.

- Contributed to outsourcing projects for Legis, supporting the development of LegisOffice, an enterprise legal management system recognized with the 2012 Best Computer Solution Award by Computerworld Colombia.
- Developed new features for the Arancel Web application, enabling more efficient handling of legal and regulatory content.

▼ SKILLS

- **Backend & Frameworks:** C#, .NET 8/7, .NET Core, .NET Framework, ASP.NET Core, ASP.NET Web API, Minimal APIs, Entity Framework / EF Core, LINQ, REST APIs, Ruby on Rails.
- **Frontend:** ASP.NET MVC, React, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Design.
- **Databases:** SQL Server, PostgreSQL, Oracle, Informix, Sybase, MySQL.
- **Cloud & DevOps:** AWS (S3, Lambda), Azure, Terraform, CDK, GH Actions, Azure DevOps, Ansible, Docker.
- **Tools & Methods:** CI/CD, Git, GitHub, GitLab, Swagger, Postman, TDD, Unit Testing, Integration Testing, SDLC, Scrum.
- **Professional Skills:** Team Leadership, Communication, Problem-Solving, Attention to Detail.

▼ EDUCATION & TRAINING

Minimal APIs in ASP.NET Core

Code Maze — Virtual | May 2025 – Dec 2025

Topics: .NET 9, Minimal APIs, Onion Architecture, validation, exception handling, Serilog logging, pagination, filtering, HATEOAS, Swagger/OpenAPI, caching, rate limiting, authentication, integration testing.

EPAM Learning

EPAM Learning — Virtual | May 2025 – Dec 2025

Devs Fundamentals Topics: Linux, Bash, Docker, Python, Software Development Tools, CI/CD with Jenkins.

Cloud & Automation Tools Topics: Azure fundamentals, Terraform (IaC), Ansible (configuration management), cloud automation, CI/CD practices.

Cloud Architecture Bootcamp

Min TICS Colombia - Talent Tech Bootcamp - Sep 2024 – Nov 2024

Cloud architecture concepts in AWS and Azure, focused on network configuration, cloud management, and infrastructure automation. Built full-stack cloud apps using AWS Amplify and React for the frontend with Python backend services on AWS. Implemented authentication and authorization with Amazon Cognito.

Microservices in .NET

Code Maze — Virtual | Oct 2024 – Jan 2025

Topics: Microservices architecture, service communication, scalability, resilience, deployment patterns, best practices in .NET.

Full-Stack Web Development Program

Microverse — Remote | Feb 2022 – Sep 2022

Topics: HTML5, CSS, JavaScript, TypeScript, React, Redux, Ruby on Rails, Git/GitHub, PostgreSQL, Responsive Web Design, Pair Programming, Agile workflows. Completed 1,300+ hours focused on algorithms, data structures, and full-stack development, building multiple end-to-end applications using modern frontend (React, Redux) and backend technologies.

Systems Engineering (Bachelor's Degree)

National University of Colombia — In-Person | Graduated Mar 2000

Thesis: Fast Fourier Transform (FFT) using parallel processing.
